A Study of the Efficacy and Safety of Brolucizumab vs. Aflibercept in Patients With Visual Impairment Due to Diabetic Macular Edema

19/08/2025 05:14:48

Main Information

Primary registry identifying number
LBCTR2019030200

Protocol number
RTH258B2302

MOH registration number
31193/2018

Study registered at the country of origin
Yes

Study registered at the country of origin: Specify

Type of registration
Retrospective

Type of registration: Justify
LCTR was recently initiated, original file was previously submitted by Paper

Date of registration in national regulatory agency
23/07/2018

Primary sponsor
Novartis Pharma Services Inc.

Primary sponsor: Country of origin
Novartis Pharmaceuticals

Date of registration in primary registry
08/07/2019

Public title
A Study of the Efficacy and Safety of Brolucizumab vs. Aflibercept in Patients With Visual Impairment Due to Diabetic Macular Edema

Acronym
KITE

Scientific title
A Two-Year, Two-Arm, Randomized, Double Masked, Multicenter, Phase III Study Assessing the Efficacy and Safety of Brolucizumab Versus Aflibercept in Adult Patients With Visual Impairment Due to Diabetic Macular Edema

Acronym

Brief summary of the study: English
The purpose of this study is to evaluate the efficacy and safety of brolucizumab in treatment of patients with visual impairment due to diabetic macular edema (DME).

Brief summary of the study: Arabic
دراسة مرحلة ثالثة، متعدّدة المراكز، مزدوجة التعمية، عشوائيّة التوزيع، من مجموعتين، مدّتها سنتان، لتقييم فعاليّة وسلامة دواء بروليوسيزوماب مقابل دواء أفليبرسبت لدى المرضى البالغين المصابين بضعف بصريّ ناتج عن الوذمة البقعيّة السكريّة

Health conditions/problem studied: Specify
Patients With Visual Impairment Due to Diabetic Macular Edema

Interventions: Specify
•Drug: Brolucizumab
Intravitreal injection

Other Name: RTH258, ESBA1008

•Drug: Aflibercept

Intravitreal injection

Other Name: Eylea

Key inclusion and exclusion criteria: Inclusion criteria

•Written informed consent before any assessment
•Patients with type 1 or type 2 diabetes mellitus and HbA1c of ≤10% at screening
•Medication for the management of diabetes stable within 3 months prior to randomization and is expected to remain stable during the course of the study

Key inclusion and exclusion criteria: Gender

Both

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Age maximum

90

Key inclusion and exclusion criteria: Exclusion criteria

•Active proliferative diabetic retinopathy in the study eye
•Active intraocular or periocular infection or active intraocular inflammation in the study eye
•Uncontrolled glaucoma in the study eye defined as intraocular pressure (IOP) > 25 millimeters mercury (mmHg)
•Previous treatment with anti-VEGF drugs or investigational drugs in the study eye
•Stroke or myocardial infarction during the 6-month period prior to baseline
•Uncontrolled blood pressure defined as a systolic value ≥160 mmHg or diastolic value ≥100 mmHg

Other protocol-specified inclusion/exclusion criteria may apply

IMP has market authorization

No

IMP has market authorization: Specify

Name of IMP

RTH258 (Brolucizumab)

Year of authorization

Month of authorization

Type of IMP

Immunological

Pharmaceutical class

Anti VEGF-A

Therapeutic indication

Diabetic Macular Edema

Therapeutic benefit

Change from baseline in best-corrected visual acuity (BCVA) at Week 52

Study model

IPD sharing statement plan

No

IPD sharing statement description

Novartis is committed to sharing with qualified external researchers, access to patient-level data and supporting clinical documents from eligible studies. These requests are reviewed and approved by an independent review panel on the basis of scientific merit. All data provided is anonymized to respect the privacy of patients who have participated in the trial in line with applicable laws and regulations. This trial data availability is according to the criteria and process described on ww.clinicalstudydatarequest.com.

Health Conditions or Problems Studied

Condition	Code	Keyword
Diabetic macular edema	Oedema, unspecified (R60.9)	Macular Edema

Interventions

Intervention	Description	Keyword
Physical Exam, Vital signs, ophtalmic Exam, IOP, Optical Coherence Tomography, Fluorescein Angiography, Color Fundus photography, Urinalysis, Serum/ urine pregnancy test, lab test, completion of QoL questionnaires	ICF, Lab, questionnaires, Medication administration, physical examination	ICF, Lab tests, Questionnaires, Medication administration

Primary Outcomes

Name	Time Points	Measure
Change from baseline in best-corrected visual acuity (BCVA)	Baseline, week 52	baseline, week 52

Key Secondary Outcomes

Name	Time Points	Measure
Average change from baseline in BCVA	wk 40 till wk 52	wk 40 till wk 52
Proportion of patients with injections per planned dosing regimen	wk8,12,16	wk8,12,16
Change from baseline in central subfield thickness	baseline up to wk 100	baseline up to wk 100
