REPUBLIC OF LEBANON Lebanon Clinical Trials Registry

## Clinical Study of Oral cMET Inhibitor INC280 in Adult Patients With EGFR Wild-type Advanced Non-small Cell Lung Cancer

14/08/2025 06:01:27

Primary registry identifying number	Protocol number
-Imary registry identifying number _BCTR2019121368	CINC280A2201
MOH registration number	
ص/4331	
Study registered at the country of origin	Study registered at the country of origin: Specify
Yes	
Type of registration	Type of registration: Justify
Retrospective	This study already started before LBCTR registry and still ongoing
Date of registration in national regulatory agency 15/05/2015	
Primary sponsor	Primary sponsor: Country of origin
Novartis Pharma Services Inc.	Novartis Pharma Services Inc.
Date of registration in primary registry	Date of registration in national regulatory agency
13/08/2020	15/05/2015
Public title	Acronym
Clinical Study of Oral cMET Inhibitor INC280 in Adult Patients With EGFR Wild-type Advanced Non-small Cell Lung Cancer	
Scientific title	Acronym
A Phase II, Multicenter Study of Oral cMET Inhibitor INC280 in Adult Patients With EGFR Wild-type (wt), Advanced Non-small Cell Lung Cancer (NSCLC)	
Brief summary of the study: English	
A phase II study to evaluate antitumor activity of oral cMET inhibitor INC280 in adult patients with EGFR wild-type, advanced non-small cell lung cancer (NSCLC) as measured by overall response rate (ORR). The study will also evaluate safety and pharmacokinetics of INC280.	
Brief summary of the study: Arabic	
الرئة غير ذي الخلايا الصغيرة INC280 الفموي cMET دراسة مرحلة ثانية متعددة المراكز لمنبّط EGFR المتقدّم من النوع الحاد	لدى المرضى البالغين المصابين بسرطان ا
Health conditions/problem studied: Specify	
advanced non-small cell lung cancer (NSCLC)	
Interventions: Specify	
INC280 (capmatinib)	
Key inclusion and exclusion criteria: Inclusion criteria	
Inclusion Criteria: •Stage IIIB or IV NSCLC (any histology) at the time of study entry	
•Histologically or cytologically confirmed diagnosis of NSCLC that is:

2 AND ALK-negative rearrangement as part of the patient standard of care by a validated test

1.EGFR wt as per patient standard of care by a validated test

## **REPUBLIC OF LEBANON** Lebanon Clinical Trials Registry

3.AND (by central assessment) either: □Cohort 1: Pre-treated patients with cMET GCN  $\geq$  6 or □Cohort 2: Pre-treated patients with cMET GCN ≥4 and < 6, or □Cohort 3: Pre-treated patients with cMET GCN < 4, or Cohort 4: Pre-treated patients with cMET mutations regardless of cMET GCN, or Cohort 5: Treatment-naïve patients with cMET dysregulation, or □Cohort 6: Pre-treated patients with either cMET GCN ≥ 10 without cMET mutations or cMET mutations regardless of cMET GCN, or Cohort 7: Treatment-naïve patients with cMET mutations regardless of cMET GCN •To be eligible for Cohorts 1-4, patients must have failed one or two prior lines of systemic therapy for advanced/metastatic disease •To be eligible for Cohort 6, patients must have failed one prior line of systemic therapy for advanced/metastatic disease •To be eligible for Cohort 5 and Cohort 7, patients must not have received any systemic therapy for advanced/metastatic disease •At least one measurable lesion as defined by RECIST 1.1 Patients must have recovered from all toxicities related to prior anticancer therapies to grade ≤ 1 (CTCAE v 4.03). Patients with any grade of alopecia are allowed to enter the study. •Patients must have adequate organ function •ECOG performance status (PS) of 0 or 1 Details and other protocol-defined inclusion criteria may apply Key inclusion and exclusion criteria: Gender Key inclusion and exclusion criteria: Specify gender Both Key inclusion and exclusion criteria: Age minimum Key inclusion and exclusion criteria: Age maximum qq 18 Key inclusion and exclusion criteria: Exclusion criteria Exclusion Criteria: •Prior treatment with crizotinib, or any other cMET or HGF inhibitor •Patients with characterized EGFR mutations that predict sensitivity to EGFR therapy, including, but not limited to exon 19 deletions and exon 21 mutations •Patients with characterized ALK-positive rearrangement Clinically significant, uncontrolled heart diseases. •Patients receiving treatment with medications that cannot be discontinued at least 1 week prior to first INC280 treatment and for the duration of the study. Strong inducers of CYP3A4 Impairment of GI function or GI disease that may significantly alter the absorption of INC280 •Patients receiving treatment with any enzyme-inducing anticonvulsant •Applicable to Cohorts 1-4 and Cohort 6 only: Previous anti-cancer and investigational agents within 4 weeks or ≤ 5 x half-life of the agent (whichever is longer) before first dose •Pregnant or nursing women •Women of child-bearing potential, unless they are using highly effective methods of contraception •Sexually active males unless they use a condom during intercourse Presence or history of interstitial lung disease or interstitial pneumonitis, including clinically significant radiation pneumonitis Other protocol-defined exclusion criteria may apply Type of study Interventional Type of intervention Type of intervention: Specify type N/A Pharmaceutical Trial scope Trial scope: Specify scope N/A Therapy Study design: Allocation Study design: Masking N/A: Single arm study Open (masking not used) Study design: Control Study phase N/A 2 Study design: Purpose Study design: Specify purpose
