REPUBLIC OF LEBANON Lebanon Clinical Trials Registry

Other Name: ABL001

- Drug: Asciminib Taken orally, once daily, in the morning with low-fat meal or twice daily in fasting state Other Name: ABL001

- Drug: Imatinib Taken orally, once daily, in the morning with low-fat meal Other Name: STI571

- Drug: Nilotinib Taken orally, twice daily, on an empty stomach Other Name: AMN107

- Drug: Bosutinib Taken orally, once daily, with food

- Drug: Dasatinib Taken orally, once daily in a fasted state, 1 or 2 hours before a meal Other Name: Sprycel

Key inclusion and exclusion criteria: Inclusion criteria

1- Participant with PH+ CML or PH+ ALL currently receiving treatment with asciminib (single agent or in combination with imatinib, nilotinib or dasatinib), imatinib, nilotinib or bosutinib alone within a Novartis-sponsored study and, in the opinion of the Investigator, would benefit from continued treatment.

2- Participant has demonstrated compliance on the parent study protocol and is willing and able to comply with scheduled visits, treatment plans and any other study procedures.

Key inclusion and exclusion criteria: Gender

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age maximum

Both

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Exclusion criteria

1- Participant has been discontinued from parent study treatment.

2- Participant currently has unresolved toxicities reported as possibly related to study treatment in the parent study.

3- Participant's ongoing treatment is currently approved and reimbursed at country level.

4- Pregnant or nursing (lactating) women.

5- Women of child-bearing potential, unless they are using highly effective methods of contraception and willing to continue while taking study treatment.

99

6- Sexually active males receiving imatinib, nilotinib, bosutinib or dasatinib unwilling to follow the relevant contraception requirements in the local prescribing information.

7- Applicable only for participants on bosutinib treatment that switch to asciminib treatment at enrollment:

- Asymptomatic pancreatitis

- abnormal ECG

- any grade 3 or 4 toxicity not resolved to grade 2 or lower within 28 days before starting asciminib treatment

Chronic Myelogenous Leukemia	Leukaemia, unspecified (C95.9)	CML	
Acute Lymphoblastic Leukemia	Leukaemia, unspecified (C95.9)	ALL	

Interventions			
Intervention	Description	Keyword	
Consenting, IMP administration	Consenting, IMP administration	Consenting, IMP administration	

Primary Outcomes		
Name	Time Points	Measure
Number of participabts with adverse events (AEs) and serious adverse events (SAEs)	5 years	All AEs and SAEs will be tabulated and listed for participants in the Safety Set by treatment group. From day of first administration of study treatment to 30 days after the last study treatment.

Key Secondary Outcomes		
Name	Time Points	Measure
Percentage of participants with clinical benefit as assessed by Investigator	5 years	Investigators' assessment of clinical benefit will collected through the Investigator confirming that the patient is still benefiting from treatment. This will be evaluated and tabulated for participants in the Safety Set by treatment group at each visit.
