Public title

CLDK378A2X01B Roll over study in patients with ALK positive malignancies

Acronym**Scientific title**

An open-label, multi-center, Phase IV, roll-over study in patients with ALK positive malignancies who have completed a prior Novartis-sponsored ceritinib (LDK378) study and are judged by the investigator to benefit from continued treatment with ceritinib

Acronym**Brief summary of the study: English**

The rollover study will provide ceritinib to patients who are currently receiving treatment with ceritinib within a Novartis-sponsored study and in the opinion of the investigator, would benefit from continued treatment with ceritinib.

Brief summary of the study: Arabic

دراسة مرحلة رابعة مفتوحة اللصاقه ومتعددة المراكز وتكميلية لدى مرضى مصابين بأورام خبيثة إيجابية كيناز الورم الملغي الكشمي والذين وقرّر الباحث أنهم يستفيدون من مواصلة العلاج بسيريتينيب (LDK378) أنجزوا دراسة سابقة رعتها نوفارتيس حول سيريتينيب

Health conditions/problem studied: Specify

Non Small Cell Lung Cancer

Interventions: Specify

Drug : Ceritinib (Zykadia) capsules

Key inclusion and exclusion criteria: Inclusion criteria

- Patient is currently receiving treatment with ceritinib within a Novartis-sponsored study which has fulfilled the requirements for the primary objective and, in the opinion of the Investigator, would benefit from continued treatment.
- Patient has demonstrated compliance, as assessed by the investigator, with the parent study protocol requirements.
- Willingness and ability to comply with scheduled visits, treatment plans and any other study procedures.

•Written informed consent obtained prior to enrolling in the roll-over study and receiving study medication. If consent cannot be expressed in writing, it must be formally documented and witnessed via an independent trusted witness.

Key inclusion and exclusion criteria: Gender

Both

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Age maximum

99

Key inclusion and exclusion criteria: Exclusion criteria

- Patient has been permanently and prematurely discontinued from ceritinib study treatment in the parent study due to any reason.
- Patient currently has unresolved toxicities for which ceritinib dosing has been interrupted in the parent study.
- Pregnant or nursing (lactating) women, where pregnancy is defined as the state of a female after conception and until the termination of gestation, confirmed by a positive serum hCG laboratory test.
- Women of child-bearing potential, defined as all women physiologically capable of becoming pregnant, unless they are using highly effective methods of contraception during dosing and for 3 months after stopping ceritinib treatment.
- Sexually active males unless they use a condom during intercourse while taking drug and for 3 months after stopping ceritinib and should not father a child for at least 3 months after the last dose of treatment.

IMP has market authorization

Yes, Worldwide

IMP has market authorization: Specify

Albania, Argentina, Canada, United states, United Arab Emirates, Ukraine, Turkey, Switzerland, Saudi Arabia, Oman, Mexico , Malasia

Name of IMP

Zykadia

Year of authorization

Month of authorization

Type of IMP

Others

Pharmaceutical class

Ceritinib is a potent adenosine triphosphate (ATP)-competitive inhibitor of ALK kinase activity.

Therapeutic indication

patients with ALK positive malignancies Non small cell Lung Cancer

Therapeutic benefit

- To collect safety data: adverse events and serious adverse events
- To evaluate clinical benefit as assessed by the investigator
