CLDK378A2X01B Roll over study in patients with ALK postive malignancies

23/08/2025 04:45:25

Main Information

Primary registry identifying number
LBCTR2019010182

Protocol number
CLDK378A2X01B

MOH registration number
53628/2018

Study registered at the country of origin
Yes

Study registered at the country of origin: Specify

Type of registration
Prospective

Type of registration: Justify
N/A

Date of registration in national regulatory agency
27/12/2018

Primary sponsor
Novartis Pharma Services Inc.

Primary sponsor: Country of origin
Novartis Pharmaceuticals

Date of registration in primary registry
13/08/2020

Date of registration in national regulatory agency
27/12/2018

Public title
CLDK378A2X01B Roll over study in patients with ALK postive malignancies

Acronym

Scientific title
An open-label, multi-center, Phase IV, roll-over study in patients with ALK positive malignancies who have completed a prior Novartis-sponsored ceritinib (LDK378) study and are judged by the investigator to benefit from continued treatment with ceritinib

Acronym

Brief summary of the study: English
The rollover study will provide ceritinib to patients who are currently receiving treatment with ceritinib within a Novartis-sponsored study and in the opinion of the investigator, would benefit from continued treatment with ceritinib.

Brief summary of the study: Arabic
دراسة مرحلة رابعة مفتوحة اللصاقة ومتعددة المراكز وتكميليّة لدى مرضى مصابين بأورام خبيثة إيجابيّة كيناز الورم اللمفي الكشمي والذين أنجزوا دراسة سابقة رعتها نوفارتيس حول سيريتينيب (LDK378) وقرّر الباحث أنّهم يستفيدون من مواصلة العلاج بسيريتينيب

Health conditions/problem studied: Specify
Non Small Cell Lung Cancer

Interventions: Specify
Drug : Ceritinib (Zykadia) capsules

Key inclusion and exclusion criteria: Inclusion criteria
•Patient is currently receiving treatment with ceritinib within a Novartis-sponsored study which has fulfilled the requirements for the primary objective and, in the opinion of the Investigator, would benefit from continued treatment.
•Patient has demonstrated compliance, as assessed by the investigator, with the parent study protocol requirements.
•Willingness and ability to comply with scheduled visits, treatment plans and any other study procedures.

•Written informed consent obtained prior to enrolling in the roll-over study and receiving study medication. If consent cannot be expressed in writing, it must be formally documented and witnessed via an independent trusted witness.

Key inclusion and exclusion criteria: Gender

Both

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Age maximum

99

Key inclusion and exclusion criteria: Exclusion criteria

•Patient has been permanently and prematurely discontinued from ceritinib study treatment in the parent study due to any reason.
•Patient currently has unresolved toxicities for which ceritinib dosing has been interrupted in the parent study.
•Pregnant or nursing (lactating) women, where pregnancy is defined as the state of a female after conception and until the termination of gestation, confirmed by a positive serum hCG laboratory test.
•Women of child-bearing potential, defined as all women physiologically capable of becoming pregnant, unless they are using highly effective methods of contraception during dosing and for 3 months afer stopping ceritinib treatment.
•Sexually active males unless they use a condom during intercourse while taking drug and for 3 months after stopping ceritinib and should not father a child for at least 3 months after the last dose of treatment.

IMP has market authorization

Yes, Worldwide

IMP has market authorization: Specify

Albania, Argentina, Canada, United states, United Arab Emirates, Ukraine, Turkey, Switzerland, Saudi Arabia, Oman, Mexico , Malasia

Name of IMP

Zykadia

Year of authorization

Month of authorization

Type of IMP

Others

Pharmaceutical class

Ceritinib is a potent adenosine triphosphate (ATP)-competitive inhibitor of ALK kinase activity.

Therapeutic indication

patients with ALK positive malignancies Non small cell Lung Cancer

Therapeutic benefit

- To collect safety data: adverse events and serious adverse events
- To evaluate clinical benefit as assessed by the investigator
