

# An Open-label Study Evaluating Ofatumumab Treatment Effectiveness and PROs in Subjects With RMS Transitioning From Dimethyl Fumarate or Fingolimod to Ofatumumab

23/11/2024 17:24:29

## Main Information

**Primary registry identifying number**

LBCTR2021034775

**Protocol number**

COMB157G23101

**MOH registration number**

**Study registered at the country of origin**

Yes

**Study registered at the country of origin: Specify**

**Type of registration**

Prospective

**Type of registration: Justify**

N/A

**Date of registration in national regulatory agency**

**Primary sponsor**

Novartis Pharma Services Inc.

**Primary sponsor: Country of origin**

Novartis Pharmaceuticals

**Date of registration in primary registry**

29/05/2021

**Date of registration in national regulatory agency**

**Public title**

An Open-label Study Evaluating Ofatumumab Treatment Effectiveness and PROs in Subjects With RMS Transitioning From Dimethyl Fumarate or Fingolimod to Ofatumumab

**Acronym**

**Scientific title**

A Single-arm, Prospective, Multicentre, Open-label Study to Evaluate Ofatumumab Treatment Effectiveness and Patient Reported Outcomes in Patients With Relapsing Multiple Sclerosis Transitioning From Dimethyl Fumarate or Fingolimod Therapy

**Acronym**

**Brief summary of the study: English**

The open label study to evaluate effectiveness of treatment with ofatumumab in patients transitioning from commonly used oral MS therapies - fingolimod or dimethyl fumarate, due to breakthrough disease.

**Brief summary of the study: Arabic**

دراسة تقدّمية متعددة المراكز مفتوحة اللصافة ذات مجموعة واحدة لتقييم فعالية العلاج بأوفاتوموماب والنتائج التي يفيد عنها المرضى المصابين بالتصلب اللويحي الانتكاسي الذين ينتقلون من العلاج بثنائي ميثيل الفومارات أو بفينغوليمود

**Health conditions/problem studied: Specify**

Relapsing Multiple Sclerosis

**Interventions: Specify**

Biological: Ofatumumab

Patients in the ofatumumab will receive injections of ofatumumab provided in an autoinjector (AI) for subcutaneous administration containing 20 mg ofatumumab (50 mg/ml, 0.4 ml content)

Other Name: OMB157

## Key inclusion and exclusion criteria: Inclusion criteria

### Inclusion Criteria:

Diagnosis of multiple sclerosis (MS)  
Relapsing MS (RRMS or SPMS) course  
Subject transitioning from either fingolimod or dimethyl fumarate, following min 6 months treatment with either drug  
Breakthrough disease as evidence by clinical relapses or MRI  
EDSS score of 0 to 4

## Key inclusion and exclusion criteria: Gender

Both

## Key inclusion and exclusion criteria: Specify gender

## Key inclusion and exclusion criteria: Age minimum

18

## Key inclusion and exclusion criteria: Age maximum

60

## Key inclusion and exclusion criteria: Exclusion criteria

Primary progressive MS or SPMS without disease activity  
Disease duration of more than 10 years since diagnosis  
Patients with an active chronic disease of the immune system other than MS  
Patients at risk of developing or having reactivation of hepatitis  
Patients with active systemic infections or with neurological findings consistent with PML Other protocol-defined inclusion/exclusion criteria may apply

## Type of study

Interventional

## Type of intervention

Pharmaceutical

## Type of intervention: Specify type

N/A

## Trial scope

Therapy

## Trial scope: Specify scope

N/A

## Study design: Allocation

Single Arm Study

## Study design: Masking

Open (masking not used)

## Study design: Control

N/A

## Study phase

3

## Study design: Purpose

Treatment

## Study design: Specify purpose

N/A

## Study design: Assignment

Single

## Study design: Specify assignment

N/A

## IMP has market authorization

Yes, Worldwide

## IMP has market authorization: Specify

US, UAE, Albania, Argentina, Canada, Singapore, Switzerland

## Name of IMP

Ofatumumab

## Year of authorization

## Month of authorization

## Type of IMP

Immunological

## Pharmaceutical class

Monoclonal antibodies

## Therapeutic indication

Patients with:  
relapsing multiple sclerosis

**Therapeutic benefit**

potential efficacy of ofatumumab in patients with relapsing MS.

**Study model**

N/A

**Study model: Explain model**

N/A

**Study model: Specify model**

**Time perspective**

N/A

**Time perspective: Explain time perspective**

N/A

**Time perspective: Specify perspective**

N/A

**Target follow-up duration****Target follow-up duration: Unit****Number of groups/cohorts****Biospecimen retention**

Samples without DNA

**Biospecimen description**

Covance Central lab : Ambient and Frozen conditions

**Target sample size**

10

**Actual enrollment target size****Date of first enrollment: Type**

Anticipated

**Date of first enrollment: Date**

29/04/2021

**Date of study closure: Type**

Anticipated

**Date of study closure: Date**

25/06/2025

**Recruitment status**

Pending

**Recruitment status: Specify****Date of completion**

31/08/2022

**IPD sharing statement plan**

Yes

**IPD sharing statement description**

Novartis is committed to sharing with qualified external researchers, access to patient-level data and supporting clinical documents from eligible studies. These requests are reviewed and approved by an independent review panel on the basis of scientific merit. All data provided is anonymized to respect the privacy of patients who have participated in the trial in line with applicable laws and regulations.

This trial data availability is according to the criteria and process described on [www.clinicalstudydatarequest.com](http://www.clinicalstudydatarequest.com)

Health Conditions or Problems Studied		
Condition	Code	Keyword
Relapsing Multiple sclerosis	Multiple sclerosis (G35)	MS

## Interventions

Intervention	Description	Keyword
Informed Consent form , IMP administration , Visit assessment and schedule	Informed Consent form , IMP administration , Visit assessment and schedule	ICF, IMP

## Primary Outcomes

Name	Time Points	Measure
Annual Relapse Rate	96 weeks	number of confirmed relapses in a year calculated based on cumulative number of relapses by patient adjusted for time-in-study by patient

## Key Secondary Outcomes

Name	Time Points	Measure
Safety evaluation	96 weeks	Proportion of patients with adverse events, including injection related reactions, abnormal laboratory results or vital signs as well as proportion of patients discontinuing treatment due to insufficient effectiveness or safety
