Brief summary of the study: English

The primary endpoint to be measured during the study is the proportion of patients who achieve and maintain MMR at 12 months using RQ-PCR test. The study will be a multicenter, prospective, open-label, randomized Phase II study with a parallel design. Eligible patients with Ph+ CP CML will be randomly assigned to receive either dasatinib 50 mg QD or dasatinib 100 mg QD. The duration of patient participation will be 18 months.

Brief summary of the study: Arabic

الهدف الأساسي من الدراسة هو قياس نسبة المرضى الذين يحققون استجابة جزئية كبرى (MMR) شهراً باستخدام اختبار تفاعل سلسلة البوليميراز الكمي اللحظي 12 ويحافظون عليها خلال (RQ-PCR) في المرضى المؤهلين الذين يعانون من سرطان الدم النقوي المزمن الذي يحتوي على الكروموسوم فيلادلفيا. إيجابي في المرحلة المزمنة وتم توزيعهم بشكل عشوائي في ملغم مرة واحدة يومياً) أو جرعة 50 ملغم (يتم تناولها في هيئة قرص واحد 50 مجموعات العلاج لتلقي جرعة يومية من دواء دازاتينيب تبلغ يومية . ملغم مرة واحدة يومياً 50 ملغم (يتم تناولها في هيئة قرصين بحجم 100 من دواء دازاتينيب تبلغ) دراسة عشوائية، مفتوحة التسمية، من المرحلة الثانية، متعددة المراكز في دول متعددة. شهراً 18 ستكون مدة المشاركة

Health conditions/problem studied: Specify

Early Chronic Phase Chronic Myeloid Leukemia

Interventions: Specify

dasatinib 50 mg QD or dasatinib 100 mg QD

Key inclusion and exclusion criteria: Inclusion criteria

Age \geq 18 years.
Diagnosis of Ph+ or BCR-ABL positive CML in early CP (i.e. time from diagnosis <12 months).
Clonal evolution
ECOG performance of 0-2.
Adequate end organ function

Key inclusion and exclusion criteria: Gender

Both

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Age maximum

100

Key inclusion and exclusion criteria: Exclusion criteria

NYHA cardiac class 3-4 heart disease
Cardiac symptoms
History of significant bleeding disorder
Patients with active uncontrolled psychiatric disorders
Pregnant or breast-feeding women
Patients in late chronic phase (i.e. time from diagnosis to treatment >12 months), accelerated phase (except as noted in inclusion criteria 2) or blast phase

IMP has market authorization

IMP has market authorization: Specify

No

Name of IMP

Dasatinib

Year of authorization

Month of authorization

Type of IMP

Others

Pharmaceutical class

Tyrosine Kinase Inhibitor

Therapeutic indication

early chronic CML

Therapeutic benefit

Reduce the rate of adverse events and decrease cost of medications with the dose 50 mg while maintaining the efficacy.
enhance treatment compliance
