

# Clinical Study of Oral cMET Inhibitor INC280 in Adult Patients With EGFR Wild-type Advanced Non-small Cell Lung Cancer

23/11/2024 18:05:25

## Main Information

**Primary registry identifying number**

LBCTR2019121368

**Protocol number**

CINC280A2201

**MOH registration number**

4331/ص

**Study registered at the country of origin**

Yes

**Study registered at the country of origin: Specify**

**Type of registration**

Retrospective

**Type of registration: Justify**

This study already started before LBCTR registry and still ongoing

**Date of registration in national regulatory agency**

15/05/2015

**Primary sponsor**

Novartis Pharma Services Inc.

**Primary sponsor: Country of origin**

Novartis Pharma Services Inc.

**Date of registration in primary registry**

30/12/2021

**Date of registration in national regulatory agency**

15/05/2015

**Public title**

Clinical Study of Oral cMET Inhibitor INC280 in Adult Patients With EGFR Wild-type Advanced Non-small Cell Lung Cancer

**Acronym**

**Scientific title**

A Phase II, Multicenter Study of Oral cMET Inhibitor INC280 in Adult Patients With EGFR Wild-type (wt), Advanced Non-small Cell Lung Cancer (NSCLC)

**Acronym**

**Brief summary of the study: English**

A phase II study to evaluate antitumor activity of oral cMET inhibitor INC280 in adult patients with EGFR wild-type, advanced non-small cell lung cancer (NSCLC) as measured by overall response rate (ORR). The study will also evaluate safety and pharmacokinetics of INC280.

**Brief summary of the study: Arabic**

لدى المرضى البالغين المصابين بسرطان الرئة غير ذي الخلايا الصغيرة INC280 القوي cMET دراسة مرحلة ثانية متعددة المراكز لمقبط EGFR المتقدم من النوع الحاد

**Health conditions/problem studied: Specify**

advanced non-small cell lung cancer (NSCLC)

**Interventions: Specify**

INC280 (capmatinib)

**Key inclusion and exclusion criteria: Inclusion criteria**

Inclusion Criteria:

- Stage IIIB or IV NSCLC (any histology) at the time of study entry
- Histologically or cytologically confirmed diagnosis of NSCLC that is:

1. EGFR wt as per patient standard of care by a validated test
2. AND ALK-negative rearrangement as part of the patient standard of care by a validated test

3. AND (by central assessment) either:

- Cohort 1: Pre-treated patients with cMET GCN  $\geq 6$  or
- Cohort 2: Pre-treated patients with cMET GCN  $\geq 4$  and  $< 6$ , or
- Cohort 3: Pre-treated patients with cMET GCN  $< 4$ , or
- Cohort 4: Pre-treated patients with cMET mutations regardless of cMET GCN, or
- Cohort 5: Treatment-naïve patients with cMET dysregulation, or
- Cohort 6: Pre-treated patients with either cMET GCN  $\geq 10$  without cMET mutations or cMET mutations regardless of cMET GCN, or
- Cohort 7: Treatment-naïve patients with cMET mutations regardless of cMET GCN

- To be eligible for Cohorts 1-4, patients must have failed one or two prior lines of systemic therapy for advanced/metastatic disease
- To be eligible for Cohort 6, patients must have failed one prior line of systemic therapy for advanced/metastatic disease
- To be eligible for Cohort 5 and Cohort 7, patients must not have received any systemic therapy for advanced/metastatic disease
- At least one measurable lesion as defined by RECIST 1.1
- Patients must have recovered from all toxicities related to prior anticancer therapies to grade  $\leq 1$  (CTCAE v 4.03). Patients with any grade of alopecia are allowed to enter the study.
- Patients must have adequate organ function
- ECOG performance status (PS) of 0 or 1 Details and other protocol-defined inclusion criteria may apply

**Key inclusion and exclusion criteria: Gender**

Both

**Key inclusion and exclusion criteria: Specify gender**

**Key inclusion and exclusion criteria: Age minimum**

18

**Key inclusion and exclusion criteria: Age maximum**

99

**Key inclusion and exclusion criteria: Exclusion criteria**

Exclusion Criteria:

- Prior treatment with crizotinib, or any other cMET or HGF inhibitor
- Patients with characterized EGFR mutations that predict sensitivity to EGFR therapy, including, but not limited to exon 19 deletions and exon 21 mutations
- Patients with characterized ALK-positive rearrangement
- Clinically significant, uncontrolled heart diseases.
- Patients receiving treatment with medications that cannot be discontinued at least 1 week prior to first INC280 treatment and for the duration of the study:
  - Strong inducers of CYP3A4
- Impairment of GI function or GI disease that may significantly alter the absorption of INC280
- Patients receiving treatment with any enzyme-inducing anticonvulsant
- Applicable to Cohorts 1-4 and Cohort 6 only: Previous anti-cancer and investigational agents within 4 weeks or  $\leq 5 \times$  half-life of the agent (whichever is longer) before first dose
- Pregnant or nursing women
- Women of child-bearing potential, unless they are using highly effective methods of contraception
- Sexually active males unless they use a condom during intercourse
- Presence or history of interstitial lung disease or interstitial pneumonitis, including clinically significant radiation pneumonitis

Other protocol-defined exclusion criteria may apply

**IMP has market authorization: Specify**

No

**Name of IMP**

**Year of authorization**

**Month of authorization**

INC280 (capmatinib)

**Type of IMP**

Others

**Pharmaceutical class**

adenosine triphosphate (ATP) competitive, reversible inhibitor of the c-MET receptor tyrosine kinase

**Therapeutic indication**

Adult male and female patients with EGFR wt (for exon 19 deletions and exon 21 L858R substitution mutations), ALK-negative rearrangement, advanced (stage IIIB or IV) NSCLC who have received one or two prior lines of systemic therapy for advanced/metastatic disease.

**Therapeutic benefit**

Overall Response Rate (ORR)

**IPD sharing statement description**

Novartis is committed to sharing with qualified external researchers, access to patient-level data and supporting clinical documents from eligible studies. These requests are reviewed and approved by an independent review panel on the basis of scientific merit. All data provided is anonymized to respect the privacy of patients who have participated in the trial in line with applicable laws and regulations.

This trial data availability is according to the criteria and process described on [www.clinicalstudydatarequest.com](http://www.clinicalstudydatarequest.com)
