Public title

A phase III randomized , double blind, placebo controlled study of LEE011or placebo in combination with tamoxifen and goserelin or a non-steroidal aromatase inhibitor (NSAI)and goserelin for the treatment of premenopausal women with hormone receptor positive, HER 2 negative, advanced breast cancer. (MONALEESA 7)

Acronym

MONALEESA 7

Scientific title

A phase III randomized , double blind, placebo controlled study of LEE011or placebo in combination with tamoxifen and goserelin or a non-steroidal aromatase inhibitor (NSAI)and goserelin for the treatment of premenopausal women with hormone receptor positive, HER 2 negative, advanced breast cancer.

Acronym

Brief summary of the study: English

This is a multi-center, randomized, double-blinded, placebo controlled trial in pre-menopausal women with advanced breast cancer.

The purpose of this study is to assess the efficacy of LEE011, as measured by progression free survival (PFS), in premenopausal women with HR positive, HER2 negative advanced breast cancer

Brief summary of the study: Arabic

أو الدواء الوهمي بالتزامن مع التاموكسيفين LEE011 دراسة عشوائية مزدوجة التعمية ومضبوطة بدواء وهمي في المرحلة الثالثة حول دواء الغوزيريلين أو مثبّط أروماتيز غير ستيرويدي والغوزيريلين لعلاج النساء قبل انقطاع الطمث المصابات بسرطان الثدي المتقدم الإيجابي HER2⁺ مستقبلات الهرمون وسلبتي الهير

Health conditions/problem studied: Specify

Premenopausal Women With Hormone Receptor Positive, HER2-negative Advanced Breast Cancer

Interventions: Specify

•Drug: LEE011
LEE011 600 mg daily oral

•Drug: Tamoxifen
tamoxifen 20 mg daily oral

•Drug: Letrozole
letrozole 2.5 mg daily oral

•Drug: Anastrozole
anastrozole 1 mg daily oral

•Drug: Goserelin
Goserelin 3.6 mg subcutaneous injection

•Drug: LEE011 Placebo
LEE011 placebo 600 mg daily oral

Key inclusion and exclusion criteria: Inclusion criteria

Inclusion Criteria:

- Patient has advanced (locoregionally recurrent or metastatic) breast cancer not amenable to curative therapy
- Patient is premenopausal or perimenopausal at the time of study entry
- Patients who received (neo) adjuvant therapy for breast cancer are eligible
- Patient has a histologically and/or cytologically confirmed diagnosis of estrogen-receptor positive and/or progesterone receptor positive breast cancer
- Patient has HER2-negative breast cancer
- Patient must have either measurable disease or If no measurable disease is present, then at least one predominantly lytic bone lesion
- Patient has an Eastern Cooperative Oncology Group (ECOG) performance status 0 or 1
- Patient has adequate bone marrow and organ function

Key inclusion and exclusion criteria: Gender

Female

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Age maximum

59

Key inclusion and exclusion criteria: Exclusion criteria

Exclusion Criteria:

- Patient who has received a prior CDK4/6 inhibitor
- Patient is postmenopausal
- Patients who currently have inflammatory breast cancer at screening.
- Patients who received any prior hormonal anti-cancer therapy for advanced breast cancer, except for ≤ 14 days of tamoxifen or NSAID \pm goserelin for advanced breast cancer prior to randomization.
- Patient has a concurrent malignancy or malignancy within 3 years of randomization, with the exception of adequately treated basal cell skin carcinoma, squamous cell skin carcinoma, non-melanomatous skin cancer or curatively resected cervical cancer.
- Patient with CNS metastases.
- Patient has active cardiac disease or a history of cardiac dysfunction
- Patient is currently using other antineoplastic agents
- Patient is pregnant or nursing or physiologically capable of becoming pregnant and not using highly effective contraception

Other protocol-defined Inclusion/Exclusion may apply.

No

IPD sharing statement description

Novartis is committed to sharing with qualified external researchers, access to patient-level data and supporting clinical documents from eligible studies. These requests are reviewed and approved by an independent review panel on the basis of scientific merit. All data provided is anonymized to respect the privacy of patients who have participated in the trial in line with applicable laws and regulations.

This trial data availability is according to the criteria and process described on www.clinicalstudydatarequest.com
