

A REGISTRY TO COLLECT CHARACTERISTICS AND OUTCOMES FROM PATIENTS WITH SOLID TUMORS PROFILED WITH A NEXT-GENERATION SEQUENCING TEST (WAYFIND-R)

04/04/2025 06:23:08

Main Information

Primary registry identifying number

LBCTR2022105085

Protocol number

MX39897

MOH registration number

Study registered at the country of origin

No

Study registered at the country of origin: Specify

Not Applicable - The Registry will be conducted in several countries worldwide including EU countries like France

Type of registration

Prospective

Type of registration: Justify

N/A

Date of registration in national regulatory agency

27/08/2020

Primary sponsor

F. Hoffmann-La Roche Ltd

Primary sponsor: Country of origin

Switzerland

Date of registration in primary registry

24/10/2022

Date of registration in national regulatory agency

27/08/2020

Public title

A REGISTRY TO COLLECT CHARACTERISTICS AND OUTCOMES FROM PATIENTS WITH SOLID TUMORS PROFILED WITH A NEXT-GENERATION SEQUENCING TEST (WAYFIND-R)

Acronym

WAYFIND-R

Scientific title

A REGISTRY TO COLLECT CHARACTERISTICS AND OUTCOMES FROM PATIENTS WITH SOLID TUMORS PROFILED WITH A NEXT-GENERATION SEQUENCING TEST (WAYFIND-R)

Acronym

WAYFIND-R

Brief summary of the study: English

**Key inclusion and exclusion criteria: Inclusion criteria**

Patients must meet the following criteria for enrolment in this registry:

- Patient is an adult (according to age of majority as defined by local regulations)
- Patient is currently diagnosed with any type of solid tumor cancer, at any stage of the disease, at the enrolment date (informed consent date)
- Patient has undergone NGS testing, no longer than 3 months prior to the enrolment date, irrespective of the availability of test results
- Informed consent has been obtained from the patient or legally authorized representative, as per local regulations

Key inclusion and exclusion criteria: Gender

Both

Key inclusion and exclusion criteria: Specify gender**Key inclusion and exclusion criteria: Age minimum**

18

Key inclusion and exclusion criteria: Age maximum

100

Key inclusion and exclusion criteria: Exclusion criteria

Patients who meet the below exclusion criterion at the time of enrolment will not be enrolled in this registry:

- Patient has a prior or current diagnosis of hematological malignancy

Type of study

Observational

Registry

This is an observational, non-interventional, prospective, multinational and multicenter solid tumor cancers registry. As per the EMA discussion paper, a patient registry is an organized data collection system that uses observational methods to collect uniform data on a patient population that is followed over time (EMA 2018). Patients enrolled in this registry might be already enrolled in a clinical trial or might be offered participation in a clinical trial at the same time, as applicable per inclusion/exclusion criteria of the clinical trial.

This registry will not be a product registry, as it aims to collect data on patients who are undergoing a variety of treatments for diverse solid tumors that are not predefined. Instead, enrolment is subject to the prescription of NGS within clinical practice, irrespective of the availability of test results.

Time perspective

Prospective

Time perspective: Explain time perspective

Observation Period for the participant:

The term "observation period" is defined as the period spanning from the date of consent until the date of death, loss to follow-up, withdrawal of consent, registry closure by Sponsor or site withdrawal from the registry, whichever occurs first.

Time perspective: Specify perspective

N/A

Target follow-up duration

2

Target follow-up duration: Unit

years

Number of groups/cohorts

1

Biospecimen retention

None retained

Biospecimen description

Date of study closure: Date

31/12/2024

Recruitment status

Pending

Recruitment status: Specify

Date of completion

31/12/2024

IPD sharing statement plan

Yes

IPD sharing statement description

The Sponsor maintains confidentiality standards by coding each participant enrolled in the registry through assignment of a unique participant identification number. This means that participant names or other direct identifiers are not included in datasets that are transmitted to any Sponsor location. Data protection and privacy regulations will be followed in capturing, processing, storing and sharing participant data, in accordance with local applicable privacy and confidentiality requirements. An external anonymized data sharing plan that aligns with national regulations and EU GDPR (2016) (General Data Protection Regulation) will be developed. This will outline the mechanism of data sharing with relevant research parties who are interested in utilizing the data collected in this registry for conducting SDU studies. The data will be stored in a data warehouse after closing the registry. Participant medical information obtained by this registry is confidential and may be disclosed to third parties only as permitted by the ICF (or separate authorization for use and disclosure of personal health information) signed by the participant, unless permitted or required by law. Medical information may be given to a participant's personal treating physician or other appropriate medical personnel responsible for the subject's welfare, for treatment purposes. Data collected by this registry must be available for inspection upon request by representatives of national and local health authorities, Sponsor monitors, representatives, collaborators and the IRB/EC for each registry site, as appropriate.

Health Conditions or Problems Studied

Condition	Code	Keyword
Solid Tumors	Neoplasm of uncertain or unknown behaviour, unspecified (D48.9)	ALL SOLID TUMORS

Interventions

Intervention	Description	Keyword
Non-Interventional Study (Registry)	NA	NA

Primary Outcomes

Name	Time Points	Measure
To provide a platform to support the design and conduct of clinical and epidemiological research	NA being that it's a registry	- Collect data that can inform future trial design and facilitate identification of potential trial populations - Provide a resource to identify, develop and qualify biomarkers, novel assessment tools and clinical endpoints - Provide a resource to support the conduct of disease-modeling studies
To develop an evidence-generation platform to better understand health outcomes and cancer care processes	NA being that it's a registry	- Provide a resource to inform how precision medicine tools are used and how they affect patient care in the real world - Provide a resource to generate evidence that can support clinical, regulatory and access decision-making - Provide a resource to identify and assess clinical practices that can improve the healthcare of affected individuals
To characterize the treatments and clinical course of solid tumor cancers in patients who have undergone NGS testing	NA being that it's a registry	- Collect data that describes the history of patients undergoing NGS testing - Collect data that can help identify the complex genomic landscape affecting the diagnosis and prognosis of solid tumor cancers and deepen the understanding of underlying biologic pathways - Collect data that can help identify sub-populations that may best benefit from precision medicine tools
