Public title
Roll-over Study to Allow Continued Access to Ribociclib

Acronym

Scientific title
A Post-trial Access Roll-over Study to Allow Access to Ribociclib (LEE011) for Patients Who Are on Ribociclib Treatment in Novartis-sponsored Study

Acronym

Brief summary of the study: English
This is an open-label, multi-center, roll-over study to evaluate the long term safety of ribociclib in combination with other drugs in participants who are participating in a Novartis sponsored global study, that has fulfilled requirements for its primary objective(s), and who in the opinion of the Investigator, would benefit from continued treatment.

Brief summary of the study: Arabic
هذه دراسة تمديد مفتوحة التسمية ومتعددة المراكز لتقييم السلامة طويلة المدى لريبوسيكليب بالاشتراك مع أدوية أخرى في المشاركين الذين يشاركون في دراسة عالمية ترعاها شركة نوفارتيس، والتي أوفت بمتطلبات هدفها الأساسي (أهدافها)، ومن يعتقد طبيب الدراسة أنه سيستفيد من استمرار العلاج.

Health conditions/problem studied: Specify
Metastatic Breast Cancer

Interventions: Specify
Drug: Ribociclib (Participants continue ribociclib as was administered in their parent study)
Drug: Letrozole (Participants continue ribociclib in combination with letrozole as was administered in their parent study)
Drug: Anastrozole (Participants continue ribociclib in combination with anastrozole as was administered in their parent study)
Drug: Goserelin (Participants continue ribociclib in combination with goserelin as was administered in their parent study)
Drug: Tamoxifen (Participants continue ribociclib in combination with tamoxifen as was administered in their parent study)
Drug: Fulvestrant (All participants continue ribociclib in combination with fulvestrant as was administered in their parent study)

Key inclusion and exclusion criteria: Inclusion criteria

1. Currently participating in a Novartis sponsored global study (parent study), receiving treatment with ribociclib in combination with other drugs, and the parent study has fulfilled its primary objective(s)
2. Must have been receiving treatment with ribociclib for at least 6 cycles in the parent study
3. Currently has evidence of clinical benefit as determined by the Investigator

Key inclusion and exclusion criteria: Gender

Both

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Age maximum

99

Key inclusion and exclusion criteria: Exclusion criteria

1. Permanent discontinuation of ribociclib in the parent study
2. Currently has unresolved toxicities for which ribociclib dosing has been interrupted in the parent study
3. Local access to commercially available ribociclib and reimbursed

IMP has market authorization

Yes, Lebanon and Worldwide

IMP has market authorization: Specify

US, EU, and other countries

Name of IMP

Ribociclib

Year of authorization

2017

Month of authorization

1

Type of IMP

Others

Pharmaceutical class

highly selective small molecule inhibitor of cyclin-dependent kinases 4 and 6 (CDK4/6)

Therapeutic indication

Metastatic Breast Cancer

Therapeutic benefit

continued treatment to participants who are currently receiving ribociclib

Study model

N/A

Date of completion

IPD sharing statement plan
Yes

IPD sharing statement description
Novartis is committed to sharing with qualified external researchers, access to patient-level data and supporting clinical documents from eligible studies. These requests are reviewed and approved by an independent review panel on the basis of scientific merit. All data provided is anonymized to respect the privacy of patients who have participated in the trial in line with applicable laws and regulations.

This trial data availability is according to the criteria and process described on www.clinicalstudydatarequest.com

Health Conditions or Problems Studied

Condition	Code	Keyword
Metastatic Breast Cancer	Malignant neoplasm of breast (C50)	Metastatic Breast Cancer

Interventions

Intervention	Description	Keyword
ICF, IMP administration, local Labs	ICF, IMP administration, local Labs	ICF, IMP administration, local Labs

Primary Outcomes

Name	Time Points	Measure
Percentage of participants with treatment-emergent adverse events (AES)	From day of first dose of study medication to 30 days after last dose of study medication, up to 5 years	The percentage of participants with treatment-emergent adverse events will be summarized, including significant adverse events leading to discontinuation, and adverse events leading to dose adjustment

Key Secondary Outcomes

Name	Time Points	Measure
Clinical benefit rate	Up to 5 years	Percentage of participants with clinical benefit as assessed by the Investigator at scheduled study visits
