Public title

An Open Label, Multi-center Asciminib Roll-over Study to Assess Long-term Safety in Patients Who Have Completed a Novartis Sponsored Asciminib Study and Are Judged by the Investigator to Benefit From Continued Treatment

Acronym

Asciminib Roll-over Study

Scientific title

An Open Label, Multi-center Asciminib Roll-over Study to Assess Long-term Safety in Patients Who Have Completed a Novartis Sponsored Asciminib Study and Are Judged by the Investigator to Benefit From Continued Treatment

Acronym

Brief summary of the study: English

This is a long term safety study for patients who have completed a Novartis sponsored asciminib study and are judged by the investigator to benefit from continued treatment

Brief summary of the study: Arabic

دراسة تمديد لدى مرضى أنجزوا دراسة حول أسكيمينيب برعاية نوفارتيس وبحسب تقدير الباحث يستفيدون من مواصلة العلاج

Health conditions/problem studied: Specify

Chronic Myelogenous Leukemia
Acute Lymphoblastic Leukemia

Interventions: Specify

- Drug: Asciminib single agent
Taken orally, twice daily (BID) or once daily (QD), in fasting state

Other Name: ABL001

- Drug: Asciminib

Taken orally, once daily, in the morning with low-fat meal or twice daily in fasting state

Other Name: ABL001

- Drug: Imatinib

Taken orally, once daily, in the morning with low-fat meal

Other Name: STI571

- Drug: Nilotinib

Taken orally, twice daily, on an empty stomach

Other Name: AMN107

- Drug: Bosutinib

Taken orally, once daily, with food

- Drug: Dasatinib

Taken orally, once daily in a fasted state, 1 or 2 hours before a meal

Other Name: Sprycel

Key inclusion and exclusion criteria: Inclusion criteria

1- Participant with PH+ CML or PH+ ALL currently receiving treatment with asciminib (single agent or in combination with imatinib, nilotinib or dasatinib), imatinib, nilotinib or bosutinib alone within a Novartis-sponsored study and, in the opinion of the Investigator, would benefit from continued treatment.

2- Participant has demonstrated compliance on the parent study protocol and is willing and able to comply with scheduled visits, treatment plans and any other study procedures.

Key inclusion and exclusion criteria: Gender

Both

Key inclusion and exclusion criteria: Specify gender

Key inclusion and exclusion criteria: Age minimum

18

Key inclusion and exclusion criteria: Age maximum

99

Key inclusion and exclusion criteria: Exclusion criteria

1- Participant has been discontinued from parent study treatment.

2- Participant currently has unresolved toxicities reported as possibly related to study treatment in the parent study.

3- Participant's ongoing treatment is currently approved and reimbursed at country level.

4- Pregnant or nursing (lactating) women.

5- Women of child-bearing potential, unless they are using highly effective methods of contraception and willing to continue while taking study treatment.

6- Sexually active males receiving imatinib, nilotinib, bosutinib or dasatinib unwilling to follow the relevant contraception requirements in the local prescribing information.

7- Applicable only for participants on bosutinib treatment that switch to asciminib treatment at enrollment:

- Asymptomatic pancreatitis

- abnormal ECG

- any grade 3 or 4 toxicity not resolved to grade 2 or lower within 28 days before starting asciminib treatment

IPD sharing statement plan

Yes

IPD sharing statement description

Novartis is committed to sharing with qualified external researchers, access to patient-level data and supporting clinical documents from eligible studies. These requests are reviewed and approved by an independent review panel on the basis of scientific merit. All data provided is anonymized to respect the privacy of patients who have participated in the trial in line with applicable laws and regulations.

This trial data availability is according to the criteria and process described on www.clinicalstudydatarequest.com

Health Conditions or Problems Studied

| Condition | Code | Keyword |
|------------------------------|--------------------------------|---------|
| Chronic Myelogenous Leukemia | Leukaemia, unspecified (C95.9) | CML |
| Acute Lymphoblastic Leukemia | Leukaemia, unspecified (C95.9) | ALL |

Interventions

| Intervention | Description | Keyword |
|--------------------------------|--------------------------------|--------------------------------|
| Consenting, IMP administration | Consenting, IMP administration | Consenting, IMP administration |

Primary Outcomes

| Name | Time Points | Measure |
|--|-------------|---|
| Number of participants with adverse events (AEs) and serious adverse events (SAEs) | 5 years | All AEs and SAEs will be tabulated and listed for participants in the Safety Set by treatment group. From day of first administration of study treatment to 30 days after the last study treatment. |

Key Secondary Outcomes

| Name | Time Points | Measure |
|--|-------------|--|
| Percentage of participants with clinical benefit as assessed by Investigator | 5 years | Investigators' assessment of clinical benefit will be collected through the Investigator confirming that the patient is still benefiting from treatment. This will be evaluated and tabulated for participants in the Safety Set by treatment group at each visit. |
